GRYPHON PSYCHOLOGY

SHARE

Sexual Harassment & Assault Referral Entryway

A specialist service to support those impacted by sexual harassment or sexual assault.

How an organisation supports those impacted by sexual harassment or sexual assault is crucial. If the company responds poorly or doesn't respond at all, this can negatively effect the impacted person or persons, the work environment and the organisation as a whole.

The implementation of the SHARE service allows organisations to offer support to individuals who are impacted by sexual assault or sexual harassment, either within or away from the workplace. Gryphon's clinical staff provide longer term treatment using recognised therapeutic intervention models to support the impacted individual.

ORGANISATIONAL RESPONSIBILITY
